PROFILE

Networking and IT project manager with nearly ten years of experience directing technology projects, managing people, budgets and schedules, and running project communication, backed by a BCA and Cisco CCNA. Works independently in AI data and evaluation: data annotation, model training and quality checks, prompt and LLM output evaluation, localization and transcription, and search engine quality rating. Works remotely, to written guidelines and deadlines.

Objective: To bring proven skills and expertise to a forward-thinking organization where new ideas are championed and real impact is the goal. Ready to contribute right away, and thrives when collaborating with smart, motivated people who believe in sharing knowledge and growing together.
